

**Ink good exclusively
for PE material**

Newly developed for printing on PE

High durability fixing property for printing on PE materials

Good for small character printing

Ink name : **CN300 Black Ink**

No irksome surface finishing required on the substrate such as corona treatment.

※ There are exceptional cases of surface treatments that may cause enduring fixation failure.

■ Deprivation test using a tape

Left: shows removal with the conventional ink Right: shows passing the deprivation test with the new CN300 black ink

The conventional ink failed in the deprivation test.

The new CN300 black ink passes the deprivation test.

■ Good for small character printers

**KGK JET
CCS3000**

Standard model

Dramatically reduces running cost.

Solvent consumption reduced by 35% compared from conventional printers.

Meeting with IP65, CE directive and RoHS.

**KGK JET
CCS-R**

Affordable model CCS-R

Robust construction with stainless steel material

Works even in the environment where water is used.

IP24 met
